**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the socket" in line 1, "the surface" in line 1, "the head" in line 1, "the body" in line 2, "the center" in line 3 and "the sides" in line 4. There is insufficient antecedent basis for these limitations in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gill (4,126,908). Gill discloses a punch for forming a screw socket comprising a recess (41) formed on one end of a punch body (40), a punching head (42) protruding from a center of the recess, and multiple wings (43) extending from sides of the punching head at a level lower than that of the punch.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Muenchinger (3,120,012). Muenchinger discloses a punch for forming a screw socket comprising a

recess (71) formed on one end of a punch body (70), a punching head (72) protruding from a center of the recess, and multiple wings (75) extending from sides of the punching head at a level lower than that of the punch.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hyatt (6,390,929). Hyatt discloses a punch body (80) having multiple wings (82) extending from sides of the punch body. The wings (82) are at a lower level than the head of the punch.

***Conclusion***
